

Which Week?

This Week: Monday 30th Sept (Week 1)

Next week: Monday 7th Sept (Week 2)

Inside Kingshurst

Friday = Staff Training Day

A reminder that this coming Friday is a Staff Training Day, something of which is a normal fixture within the academic calendar for the end of September; as such the site will not be open for any students.

All students will return as normal for their 8.30am registration on Monday 7th October (Week 2).

4 October 2024

Trust INSET Day

To Rain or Not to Rain?

We wish all of our Year 11 GCSE Geographers the very best this week as they venture into Stratford Upon Avon for an educational visit to support their preparations for their field work specific exam paper.

We will find out whether they come back wet or dry next week!

Fact of the week: Standing still is the best way to save a penalty in football

With some of our football teams about to start this year's campaign as of this week (come-on!), we thought we'd 'kick-off' this year's fact of the week with a football fact that may just make you the hero-of-the-day (or the country if you end up being our national goal keeper!). **Statistics prove that the best thing to do is to stay exactly where you are. You are twice as likely to save it compared to a goalkeeper who dives!**

Support from our Super Students!

Despite our students always taking centre stage, the last week has seen many of them go to a 'next level' as a result of how ready and responsible they have been to support their peers as a College Captain or Form Captain, demonstrating early opportunities for leadership within the student body. This group of students will be meeting the Principal, Mr Turner, as part of their 'investment' into this prestigious role over the course of the week.

In addition, we were both appreciative and proud of the massive cohort of students who selflessly gave their time last week during the rainy but phenomenally successful Open Evening as Student Ambassadors, with our brilliant Sixth Formers playing a pivotal role in showing parents around the Academy site and our lower school students supporting specific subjects and the activities that they had planned for our visitors.

National Online Safety for You

The parental guides from National Online Safety have been a longstanding feature of the weekly newsletter. Their comprehensive catalogue of Parent Guides are available for you to access online for free and we would encourage all parents and carers to do this

National Online Safety: How to Manage What Your Children Watch on TV

Thanks to the internet, there are now many ways for your children to watch TV, both the old fashioned way on a big screen and via the internet with on-demand programming. Restricting and controlling what your kids can watch is harder than ever, but with the help of the guide on page 2 you can make TV safer for your kids and limit the amount that they can watch. In this guide, you'll find tips on a number of potential risks such as unrated content, inappropriate content and screen time. In the guide, you'll find tips on a number of tips such as celebrating their identity, supporting their interests and enabling emotional expression.

Thanks to the internet, there are now many ways for your children to watch TV, both the old fashioned way on a big screen and via the internet with on-demand programming. Restricting and controlling what your kids can watch is harder than ever, but with our help you can make TV safer for your kids and limit the amount that they can watch.

How to manage what your children WATCH ON TV

TRADITIONAL TV

Traditional TV covers programmes broadcast directly to your TV without having to use the internet. This is the standard way that most of us watch television programmes.

BROADCAST TV

Free-to-air broadcast television is delivered via an aerial or satellite to your TV directly or through a PVR that also handles recordings. Most modern TVs and PVRs sold in the last few years will have parental controls, which restrict the content available, requiring a PIN for unsuitable programmes. The exact settings vary by manufacturer, so check your TV or PVRs manual for full details. Parental locks work by checking the rating of a programme as it's broadcast. If a show is unrated or has an incorrect rating, some content may not be blocked.

SKY TV

The version of Sky that you have defines the options available to you. If you have a Sky+ HD box, you'll need to press the Services button and select Parental Control & PIN. From here, you can turn on the Family Setting, which gives you the option to remove Adult Channels and content, and requires a PIN to be entered to buy anything or for pre-watershed playback. More granular control allows you to block specific channels, either completely or only after 8pm, requiring a PIN to watch. You can also block programmes based on ratings, although this feature only works for programmes with correct ratings, so some shows may slip through. Sky Q owners have the more powerful Kids Safe Mode, which locks the system to show only kid-safe material. This includes locking the list of viewable channels and filtering recordings to only those suitable for children. Kids Safe Mode can be enabled either on the main box or on the Sky Q Mini boxes that you might have elsewhere in your home.

INTERNET TV

There are plenty of ways to watch TV online, whether that's via the likes of iPlayer or with streaming video services, such as Netflix and Amazon Prime Instant video. Here, we'll show you how to control each.

AMAZON PRIME VIDEO

Amazon Prime Video has Parental Controls available in the Settings section of the Prime Video website. The settings let you set the age range of content that can be watched without entering a PIN: U, PG, 12, 15 and 18. Settings apply to all devices (bar the Xbox 360, Wii U and Fire TV, which have their own settings), but you can opt-out devices of your choosing in the settings. For example, you may not want to have any restrictions on your iPad, which only you use. PINs can also be used to block purchases.

NETFLIX

Netflix lets you create profiles for everyone in your house. On the Netflix home screen, if you select Manage Profiles, you can change each one to show different content, defined by age group. Children should be encouraged to use their profiles only, particularly as there's no way to PIN protect adult profiles. However, you can PIN-protect content globally, so if a child does use your profile, they're blocked from watching inappropriate content. Go to Netflix, select Account from the drop-down menu by your name and select Parental Controls. You'll be prompted to enter a PIN, but then can select which content is PIN protected by age range: Toddlers, Older Children, Teens and Adults. You can also PIN protect specific programmes by typing their name in, which could be handy if you feel a programme is unsuitable or a child has been watching it too much.

ON-DEMAND PLAYERS

If your children are watching content from on-demand services, such as BBC iPlayer or All 4, you can turn on parental controls for each via the main websites. Controls work across all devices signed into your account. Controls vary by platform. With BBC iPlayer, the parental lock requires a PIN for anything marked as requiring Guidance by the BBC. ITV Hub parental controls let you PIN protect for content with a G-rating (a guidance rating). For All 4, you can choose to protect programmes rated 16+ or 18+. If you use My5, you can set up a PIN to protect against anyone watching G-rated content. For UKTV Play, you can add a PIN to restrict content selecting one of two levels: all content that's rated 15+ or all content that's rated 18+.

HOW CAN PARENTS MANAGE THEIR CHILDREN'S TV TIME?

Particularly with on-demand content, it can be hard to restrict how much viewing time a child has. However, you can restrict internet time with parental control software, restricting how much time a child can spend online, whether they're using the internet or watching TV shows. Parental control software will generally only work on laptops, computer, tablets and phones. However, if you have parental control software that runs on the router, you can manage other devices, such as a child's smart TV and games console, and restrict time usage on these, too.

Meet our expert

This guide has been written by David Ludlow. David has been a technology journalist for more than 20 years, covering everything from internet security to the latest computing trends and the smart home. A father of two (a nine-year-old and a six-year-old), he's had to control and manage how his children access online services and use apps.
