

LEARNING JOURNEY

Biology

8.3 Reproduction

Why do we breathe?

Structure of DNA

You will learn about how we inherit characteristics, the structure of DNA and the importance of it

Gametes

You will learn about the different sex cells and how your DNA is split evenly from your mother and father

Reproductive system

You will learn about the male and female reproductive organs as well as the function of each part.

Puberty

You will learn about the changes that occur to boys and girls during puberty and the importance of them.

Menstrual cycle

You will learn about what happens at various stages of the menstrual cycle

Health and pregnancy

You will learn about the impact of alcohol and smoking on pregnancy

VOCABULARY

Hormones
Inherited
Puberty
Adolescence
Testes
Sperm
Ovary

Ovum (egg)
Fertilisation
Menstruation
Oviduct
Ovulation
Reproduction
Foetus

Biology is the study of living organisms and their environment.

In this module you will build your previous knowledge of cells and organ systems to explore the reproductive system for males and females.

You will explore the changes that occur during puberty for boys and girls and the importance of them. You will also learn about the menstrual cycle and pregnancy.
