Brain & neuropsychology

Year 11 Spring term

How the brain or the 'seat of the soul' works helps us to comprehend what it is to be human. You will develop your understanding of the human nervous system, neurons and the structure & function of the brain. Alongside this, you will build on your knowledge of brain injury and comprehend key theories and experiments surrounding neuropsychology.

VOCABULARY: Synapse, neurotransmitter, action nervous system, brain, stroke, neuropsychology.
