

LEARNING JOURNEY

PSYCHOLOGY

THE RIGHT WAY R

Attachment

Attachment begins with the interactions between babies and their caregivers. It is responsiveness of the caregiver to the baby's signals that has profound effects. You will develop an understand of the role of father in attachment and the stages of attachment. You will also assess the term maternal deprivation and the consequences on relationships. Likewise, assess the what animal research has shown regarding attachment. You will understand the influence of early attachment on later relationships

VOCABULARY: Attachment, reciprocity, interactional synchrony, monotropy, social releasers, classical/ operant conditioning, maternal deprivation, institutionalisation, privation, insecure-avoidant, insecure-resistant

READY
RESPECTFUL
RESPONSIBLE
