

LEARNING JOURNEY

Biology

Topic 11 Reproduction

Reproductive Hormones

Menstrual Cycle

You will learn how the menstrual cycle is controlled through four key hormones and how this coordination prepares the body for pregnancy.

IVF Treatment

You will learn the stages involved in IVF treatment. This treatment can also lead to some problems which are considered fully.

Plant Hormones

You will learn about how plants respond to light and gravity through photo and geo-tropisms.

Uses of Plant Hormones

You will learn how we use plant hormones to control plant growth to support our needs such as fruit ripening.

The Growth of Seeds

You will look at how hormones control the germination of seeds and how this links to gravity.

VOCABULARY

Pituitary Gland
Oestrogen
Progesterone
LH
FSH

Puberty
Infertility
Contraception
Tropism
Germination

This module continues your learning journey from previous learning from B5 Hormone Module.

In this module we focus on hormonal control of reproduction with a larger focus on the menstrual cycle.

You will then learn how we can use natural hormones as either contraception or aid fertility treatment.
