

LEARNING JOURNEY

Biology

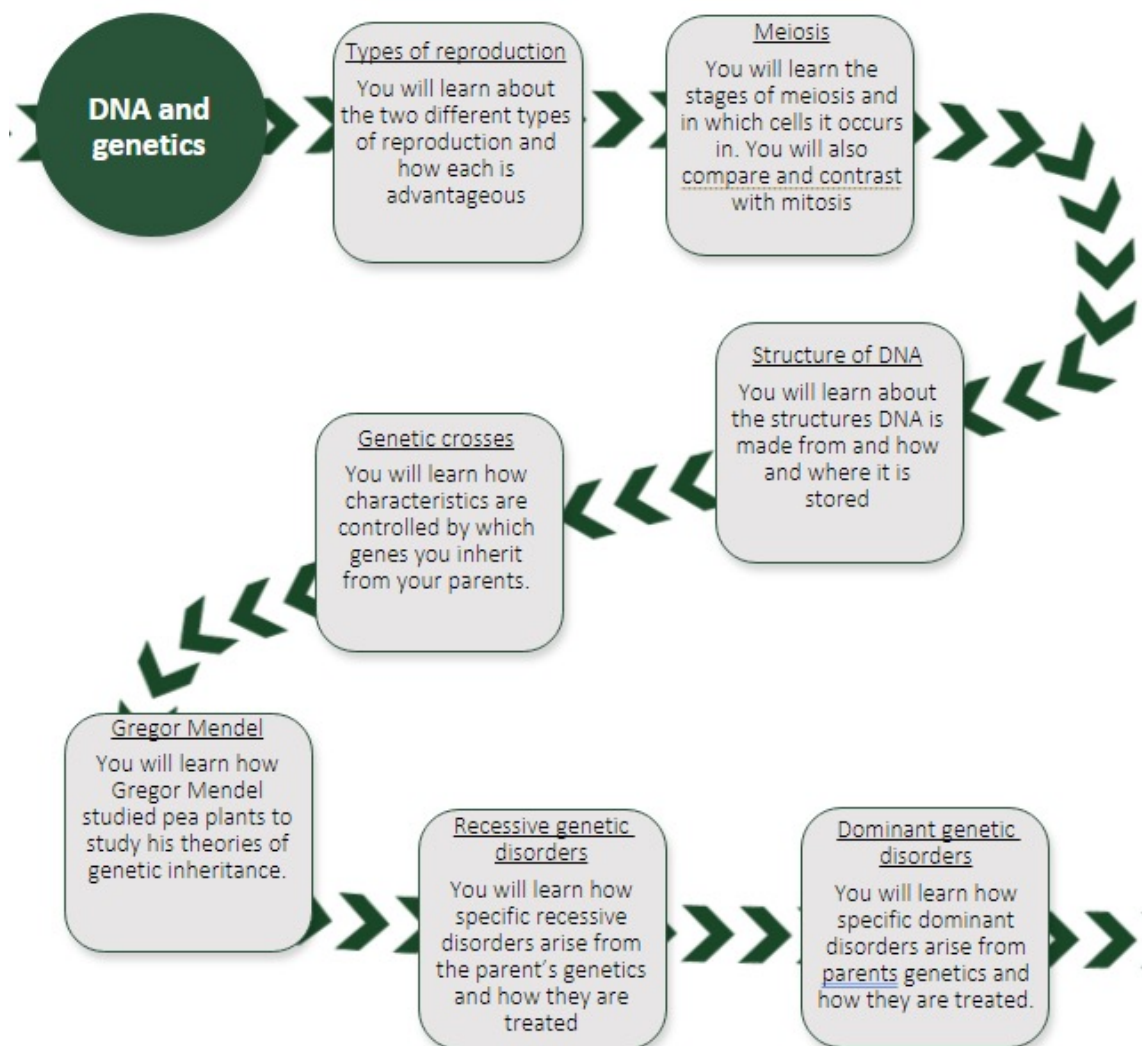

Topic 12 DNA and Genetics

Year 11 Spring Half Term 1

This module continues your learning journey from KS3 where you studied DNA and inheritance from our parents.

In this module we focus on how genes are inherited in the different types of reproduction and how our DNA is used to produce our characteristics.

You will then learn how genetic diseases are treated using modern medicine.

VOCABULARY

Genes	Asexual
Recessive	Genome
Dominant	Meiosis
Reproduction
