

LEARNING JOURNEY

Biology

Topic 8- Humans and the Environment

Year 11 Autumn Half Term 1

This module continues your learning journey from previous learning in Key Stage 3 about the environment.

You will develop a much greater understanding of interdependence between consumers and producers and how they photosynthesis and respiration aids the cycling of elements.

You will also study how the impact of exponential human population growth has impacted on the environment and what methods we're using to minimise the damage being done.
