

LEARNING JOURNEY

Biology

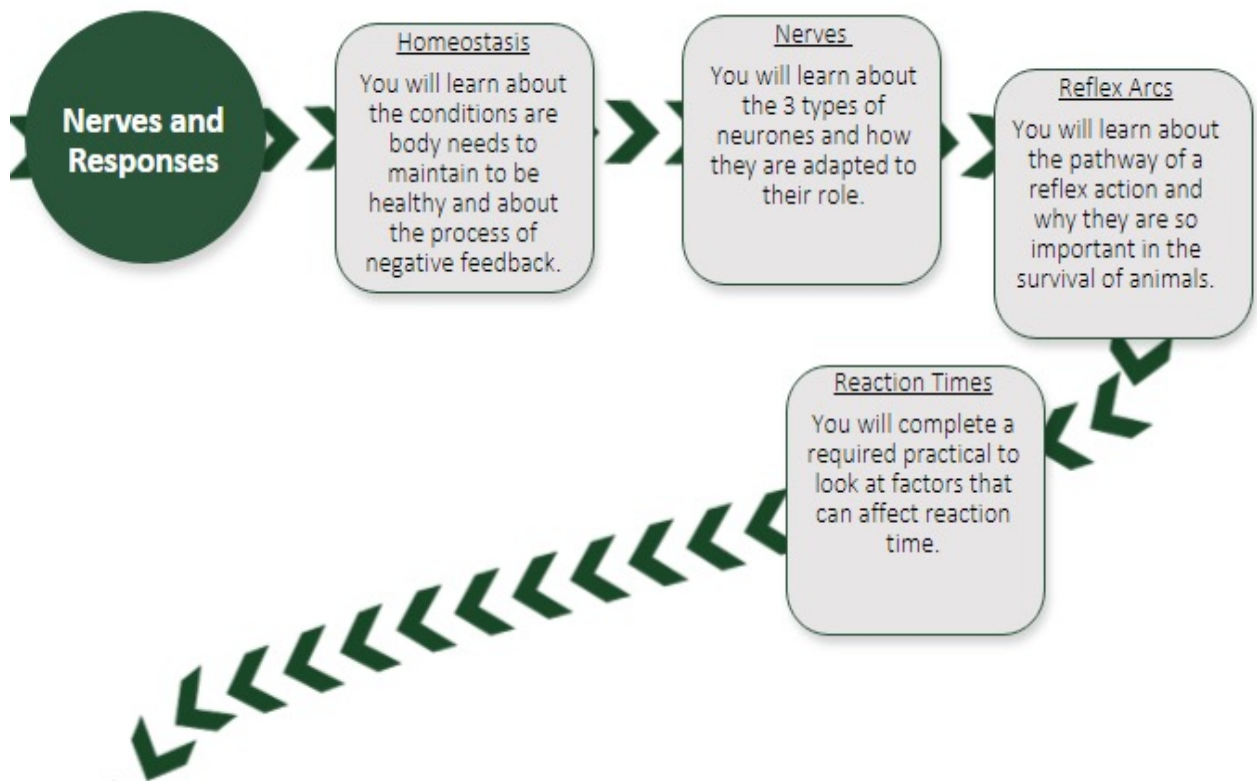

Topic 9 The Nervous System

Year 11 Autumn Half Term 2

This module continues your learning journey from previous learning in Key Stage 3 about specialised cells.

You will learn about how the nervous system helps to coordinate homeostasis in a very specific pathway called a reflex arc.

Separate Science students will also focus on how key receptors of the eyes work and how the brain coordinates the body and its responses.

VOCABULARY

Receptor
Sensory Neurone
Relay Neurone
Motor Neurone
Effector

Homeostasis
Synapse
Stimulus
