What advice would you give to yourself
on the first day of Year 11?

*“Start focusing and revising as
soon as possible”*

Gaining a minimum grade 4 or higher in English and Maths is crucial because these qualifications are required for most jobs, apprenticeships, and university courses, opening up more career and further education opportunities.

With statistics showing that strong numeracy skills correlate with higher earnings and literacy with better promotion prospects.

What is Progress and Attainment?

Decoding the Report

Minimum Expected Grade: Lowest Target

Projected Grade: Trust projection from the trust wide assessment

Progress to Target: How close above or below a student is away from their minimum target.

Year 10 Progress Report (Term 2 2024-2025)

[Redacted Student Name]

Subject	Minimum Expected Target	Projected Grade	Progress to Target	The Right Way – Ready	The Right Way – Respectful	The Right Way – Responsible
English Literature	4	3	Near	5	5	5
English Language	4	3	Near	5	5	5
Mathematics	4	4	On	4	4	4
Biology GCSE	4	4	On	5	5	5
Chemistry GCSE	4	4	On	4	4	4
Physics GCSE	4	4	On	5	5	5
Combined Science	4-4	4-4	On			
Art	4	6	Above	4	4	4
Computer Science	4	4	On	5	5	5
Geography	4	3	Near	4	4	4
STEPS	4			4	4	4

Attendance

Attendance (%)	99.72	Unauthorised Absence (%)	0.00
Sessions Missed (Number)	0	Lates (Number)	0

Behaviour Points

Positive	168	Negative	0	Overall	168
----------	-----	----------	---	---------	-----

Importance of Attendance

Data shows a strong positive correlation between higher school attendance and better academic and long-term life outcomes, including improved exam results and increased future earnings.

Key Steps for GCSE Success in Year 11

•Attend Every Lesson & Intervention

- Missing even a few hours can leave big gaps. Research shows consistent attendance is the single biggest factor in achieving top grades.

Stay on Top of Coursework & Homework

- Use it as practice for exam-style questions and to spot gaps early.

Use Past Papers Regularly

- Practice under timed conditions – examiners recycle question styles, so this gives you an advantage.

Act on Feedback

- Always review teacher comments and corrections – it's where the real learning happens.

Create a Revision Timetable

- Spread out revision (little and often) instead of last-minute cramming. Aim for **short, focused sessions (25–30 mins)** with breaks.

Prioritise Core Subjects (English, Maths, Science)

- These unlock college, sixth form, apprenticeships, and future career opportunities.

Use Active Revision Techniques

- Don't just read notes – test yourself with flashcards, quizzes, mind maps, and teaching others.

Keep Mock Exams in Perspective

- Use results to identify areas for improvement, not as a final judgment on ability.

Look After Yourself

- Sleep, exercise, and healthy food massively improve memory, focus, and exam performance.

Ask for Help Early

- Don't wait until the last minute—teachers, after-school sessions, and peers can make a huge difference.
